

Form A: Course Evaluation - Student Comments

Faculty	: Engineering	Session	: 2011 Teaching Period - T2
School	: School of Computer Science	Enrolled	: 19
Course	: COMP9242-Advanced Operating Systems	Repondents	: 9
Survey Description	: Evaluate the Course COMP9242	Survey Type	: ONLINE (12 Oct 2011 - 30 Oct 2011)
Survey Alternative	: Evaluate the Course COMP9242	Administration Date	: 01 Dec 2011

The best features of this course were

- Interesting, diverse, in depth lecture content
- Nothing more to say. Most challenging course (in a very good way) taken so far at this university. Make all the effort put in easy OS course worth. It is guaranteed that I will forget everything about OS if I did not take AOS.
- The involvement from NICTA and being able to see what research and development is being undertaken in the field, was a good addition to the theory.
- All of it! The lectures were excellent and all the lecturers clearly knew their material exceptionally well, with practical experience in the area. The assignments were pretty hard, but well targeted.
- Extremely challenging and rewarding.
- A thorough undertaking of an explanation for all the cool shit happening in AOS these days.
- project
- Challenging Coursework
- Challenging (and time-consuming!) project provided valuable and useful experience in real-world OS design and implementation.

This course could be improved by

- Dividing the 3 hour lecture into 1/2 hour lectures
- Using cooler hardware instead of the slug and hopefully budget is not an issue.
- A little more specification regarding requirements of each milestone of the project.
- having the lectures and the project integrated more.
