Excel_RDR (0.8)   09/2018
Excel_RDR made available to participants in PRICA tutorial on RDR

Excel_RDR (0.81)   04/03/2019
Tests if trust settings are correct before starting the program, and that an appropriate message is given

Excel_RDR (0.811)   08/03/2019
Fixed bug related to checking the trust settings and updated the manual

Excel_RDR (0.82)   28/8/2019
Removed the requirement to use the personal macro workbook and made the code accessible. Fixed bugs related to inserting columns, bugs related to looping through inference for GRDR and MCRDR and other small bugs

Excel_RDR (0.83)   28/10/2019
GRDR batch inferencing has been speeded up considerably, but is still very slow because it uses Excel graphic features to identify intermediate conclusions. Also fixed a big related formula conclusions not being compiled when a KBS is first opened

Excel_RDR (0.831)   4/11/2019
Fixed a bug where under one unique circumstance rules did not compile correctly for batch processing. Also found why some of the screen changes in GRDR seemed much slower than they should be

Excel_RDR (0.84)   31/5/2020
Slight speeding up and better locating of case_actions menu, but still not perfect

Excel_RDR(0.85)   17/9/2020
The undo button on the rules worksheet now removes the last added rule and you can keep on doing this. Also some minor bug fixes

Excel_RDR(0.86)   14/12/20
Added another utility to import and existing knowledge base and cases into a new version of Excel_RDR. Also inference problem with SCRDR, speeded up MCRDR inference and other minor bugs

Excel_RDR(0.861)   2/1/21
Only changed MCRDR to make sure it didn't ask about cornerstone cases that already had the conclusion given by the new rules

Excel_RDR(0.862)   8/1/21
When the program launches it checks the Excel_RDR download page (if it can reach it) and tells the user whether they have the latest version

Excel_RDR(0.864)   21/3/21

Fixed a bug when you deleted a rule, when there was only one rule. Also improved the version checker

Excel_RDR(0.865)   31/3/21
SCRDR and MCRDR same as 0.864. Fixed a bug in the compiled rules for GRDR and also improved checking for orphan rules

Excel_RDR(0.87) 20/6/22
Fixed a bug with user-defined functions with MCRDR. Added the limits function to all three which specifies a range for an attribute.

Excel_RDR(0.871) 08/11/22
Fixed a bug where attributes with string values had a blank in the string. Didn't affect any of the batch modes, only when a single rule is run to give a rule trace
