**InStep**

InStep is a global internship program and is an integral part of the Global Academic Relations initiative at Infosys. Each year, InStep recruits 175 interns from the top 100+ universities across the globe for executing high-impact projects for the organization. As part of the InStep program, students get an opportunity to expand their professional and academic horizon through a gamut of enriching experiences.

**Why InStep?**

- Opportunity to work on high-impact projects involving strategy and cutting-edge research for Infosys.
- First hand exposure to one of the world’s fastest growing economies - India.
- Interactions with business leaders and access to senior management.
- Opportunity to participate in business plan competition and industry/cultural workshops.
- Platform to interact with a diverse group of employees and interns representing over 40 different nationalities.
- Lifetime membership to the InStep alumni network of 1250+ alumni.
- Guidance from project mentors and support from student mentors.
- Comprehensive compensation package that includes a monthly stipend, round-trip airfare, guest house accommodation (on-campus) and medical insurance.
- The typical duration of an InStep project is 8-12 weeks. The exact duration depends on the nature of the project and the intern's academic calendar.
- The program is open to students from a select list of universities.

**How to Apply?**

- Submit your application online at [www.infosys.com/InStep](http://www.infosys.com/InStep) and indicate your preferred projects/areas of interest from a portfolio of 200+ projects.
- Your application will be reviewed for available InStep projects.
- Based on the above, we will facilitate one / two rounds of interviews between you and the project mentor.
- Selected applicants will be issued an offer letter within two weeks of completing the selection process.

**Internship Opportunities: Technical**

Students with a technical background are offered an opportunity to work on projects involving cutting-edge technologies in diverse areas such as BPM, Knowledge Engineering, Legacy Modernization, Security, Information Management, CRM, Mobile Computing, SOA, P2P, Enterprise Mobility, Grid Computing, Performance Engineering, Pervasive Computing, QoS and Application QoS, Web Services, Wireless and Web 2.0.

Here’s what some of our interns had to say about their projects...

---

**Ivan Gondoprastowo**, The Hong Kong University of Science and Technology

“My experience at Infosys has been an extraordinary one. The project I’m working on combines Information Retrieval and Natural Language Processing tools in order to leverage the use of Twitter as an information source for companies. It is possibly the most interesting project I have ever done in my life. Throughout the course of my internship, I have been learning and trying a lot of new things. Since my project is a proof-of-concept project, the initial idea keeps on getting refined; sometimes it is tough to keep pace with the change of idea and project requirement, but once you are used to it, everything becomes fun and exciting. Another great thing about it is that you are allowed to incorporate your ideas into your project; even better, set the direction of your project. The project mentor helps you a lot in working on your project while the student mentors are there to help you adapt to your new living environment. Living in India itself has been another great experience, as you’ll see what you won’t see in other countries. Moreover, what’s best is you get the chance to explore places in India, visit the love monument, "Taj Mahal", and the heaven on earth, "Kashmir". What a fantastic way to spend my summer!”

---

**Parul Schroff**, Purdue University

“The project I was working on introduced me to the emerging concept of digital advertising on wireless devices. It also gave me the opportunity to develop a platform to facilitate the distribution of next-generation smart advertisements to mobile device users using Infosys’ expertise in mobile computing, business analytics and consumer interfacing. This platform promises to generate significant revenues in the years to come since it directly targets digital consumers. This internship gave me the chance to interact with some of the brightest minds from around the world. My hands-on experience working on a live project helped me improve my technical as well as business knowledge. It offered insights into the thought leadership processes that typically take place in companies driven by excellence and innovation. Under the invaluable guidance of my mentors, this internship was surely the best beginning for my venture into the ‘real’ world.”
