Form A: Course Evaluation - Student Comments

Faculty	: Engineering	Session	: 2012 Teaching Period - T2
School	: School of Computer Science	Enrolled	: 16
Course	: COMP9242-Advanced Operating Systems	Repondents	: 10
Survey Description	: Evaluate the Course COMP9242	Survey Type	: ONLINE (11 Oct 2012 - 25 Oct 2012)
Survey Alternative	: Evaluate the Course COMP9242	Administration Date	: 26 Oct 2012

The best features of this course were

- The reading papers are really classical, and matches with the weekly teaching theme.
- Mind blowing amount of knowledge gained. Excellent staff.
- Challenging, provides a great chance to get into low level implementation of OS.
- Definitely the project based structure. The project is challenging, but the weekly milestones keep it in focus.
- Very challenging and exhausting course, learn a lot.
- Very interesting lectures
- Everything from lectures to assignments. It is the best course I have ever done in this university in my opinion.
- It was challenging. I learnt more then what I was expecting to.

This course could be improved by

- The AOS project is a bit heave load for most of the students.
- 12 UOC?
- Scheduling of milestones towards the end of term clashes with other courses a bit much
- I felt that the overall admin side of the course could be improved a bit. Just posting information to the course website occasionally would be helpful sometimes.
- expose more low level details to the student.
- possibly increasing it to worth 12UOCs.
